

Senior Software Developer

Limehouse Studios Ltd are looking for a Senior Full Software Developers to join our internal development team. We strive to create outstanding software products that assist our clients in the printing industry to increase productivity and reduce waste. We have several exciting new projects in the pipeline that will leverage the latest technologies to help achieve our goals of delivering stand out software.

We are looking for smart and adaptive individuals with a passion for building great software that can understand how a business operates and how to improve these workflows whilst working alongside clients. You will be involved in the full development lifecycle, with the aim of delivering unrivalled solutions to our clients and have a sense of ownership over these solutions.

Responsibilities:

- Work alongside the Product Manager and software team to produce ground-breaking services and applications
- Design, build and maintain code that is efficient, reusable, and reliable
- Maintain and set standards for development and deployment of applications
- Ensure applications perform to the highest quality and responsiveness desired
- Identify defects and bottlenecks and find remedies to these problems
- Working with the team to achieve tight deadlines through collaboration

Qualifications:

- Experience of building large business applications
- ASP.NET MV
- C#
- Microsoft SQL
- HTML/Javascript

Preferred (With commercial experience)

- Producing and consuming Restful APIs
- An ORM (such as Entity Framework, NHibernate, etc)
- An IOC Framework (Such as SimpleInjector, Windsor, etc)
- Automated Testing
- Experience with Cloud Platforms (Azure, AWS, etc)
- Agile Working Environment
- Versioning tools such as Git
- .NET Core
- Javascript Frontend Frameworks (Angular, React, Vue.js)
- Continuous Integration exposure
- Defect tracking and project management platforms (Devops, JIRA, etc)
